All day trip – In the morning we walked to the Darwin center, the parque head quarters and to the Tortoise breeding station. All very interesting – but much too hot for me. I managed not to get sunburned but the heat went to my head and I had to sit in the shade of a cactus – Jim stayed with me and Eliz sent a truck to pick us up. We all got in a bus and went bouncing up the mountain with a stop at a fabulous restaurant. Fabulous! Id would have loved it – in the pouring rain! Rain stopped when we finished, got back in bus to go up higher! Walked + walked + saw fascinating things. Saw Scalesia, vermillion flycatcher, short eared owl and lots of other people – An amazing + wonderful – but too much for me – I went to bed without my supper

April 8 Wednesday

this was a great day
Up at 6- and Traveling all
day. I felt very morose.
I felt like I had missed some
important thing, like I had been
in good company which was about
to disapate, like I had been just
on the edge of a great experience-
But I have seen some strange
and wonderful things - and I felt
comfortable with most all the people -
and I have some stunning memories
which will stay with me forever.
Got to Quito (Alameda hotel) at 5
or so, rested a little and then
went out to dinner as a group -
farewell dinner. Nice restaurant, complete
with singers and heavy Ecuadoran food.
(I have not been able to finish a meal
for about 4 days) Still felt morose
when I went to bed (and woke Barbara
up with some kind of episode)
